

PRESENTS:

**THE PERCUSSIONAIRE® Home Therapy IPV® HT™
Universal Bi-phasic IMPULSATOR®
MODEL F0012-HT**

YOUR Universal Bi-phasic (HT™) IMPULSATOR®

Self Contained Home Travel pack for Bi-phasic IPV®

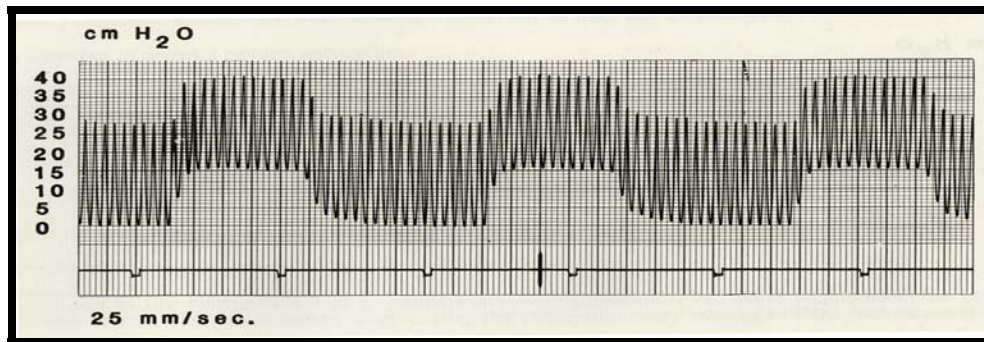

Travel the world with your IPV® HT™ IMPULSATOR® Respirator discreetly contained in a protective camera-type travel case weighing less than 15 pounds (7.5 kg), available in special engineered compressor models powered by 110 volt 60 cycle or 220 volt 50/60 cycle AC and/or by emergency 12 volt converters or small emergency power plants.

EQUALLY IMPORTANT- your (home or travel) HT™ IMPULSATOR® increases your clinical independence by providing you with the same IPV® lung recruitment therapy (any where, any time) you could receive in any major hospital if you were admitted with an acute cardio-respiratory infection.

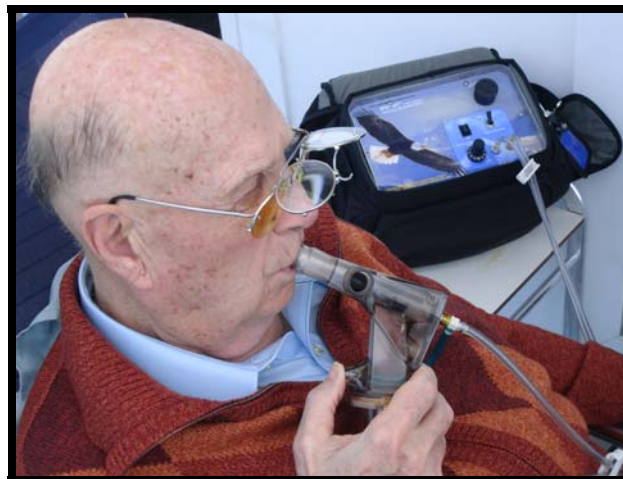

Additionally, your HT™ IMPULSATOR®

is the only transportable cardiopulmonary VENTILATOR designed for bronchiolar and alveolar lung recruitment as well as for potentially providing

MASS CASUALTY "LIFE SUPPORT"

WAVE FORMAT REVEALING PATIENT CONTROLLED Bi-phasic CHANGES IN PERCUSSIVE AMPLITUDE DURING THERAPEUTIC INTRAPULMONARY PERCUSSIVE VENTILATION (IPV®).
